

## PROCESO DE SELECCIÓN

*Ref. 24-17*

**Position name: Postdoctoral Researcher in Multiple Myeloma**

### **Job description:**

We are seeking a creative, great collaborative capacity and highly motivated Postdoc candidate to join the project “Bonding molecular genotyping and phenotyping to outcome measures in AL amyloidosis: A European REgistry and sample sharing netwoRK to promote the diagnosis and management of light chain Amyloidosis (EUREKA) AC22/00057”, funded by Instituto de Salud Carlos III and Unión Europea – NextGenerationEU, Plan de Recuperación Transformación y Resiliencia.

The candidate will join a highly collaborative environment with the opportunity to apply cutting-edge flow cytometry and genomic technologies on the field of Hematology Oncology in CIMA Research Center under the supervision of Dr. Bruno David Paiva. The work will be in permanent collaboration with an interactive international team of basic and translational researchers.

### **Required academic qualification:**

Biology training and PhD in Bioinformatics are required.

### **Other requirements:**

- Experience in biomedical research.
- Experience in sample processing, cellular and molecular biology.
- Excellent interpersonal skills (project management, English and communication –oral and written-, motivation and resilience, analytical and critical thinking, organization, creativity, initiative, vision, connectedness, teamwork abilities...).
- Experience with multidisciplinary approaches and biotechnology as well as molecular biology are highly desirable. Applicants are encouraged to apply for competitive fellowship awards.

### **Tasks to develop:**

- Work in a unique team of experts in Multiple Myeloma
- Participate in high impact projects involving next generation sequencing experiments for the study of gene regulation and epigenetics (RNA-seq, ChIP-seq, ATAC-seq, HI-C, single cell RNA-seq, etc.), flow cytometry and cellular and molecular studies.
- Analyze and integrate cancer genomic data.
- Participate in the development of data analysis workflows and pipelines for high throughput “omics” data.
- Collaborate in multiple projects, having the possibility to carry on a personal research project.
- Collaborate with the development of any bioinformatic necessary tools to accomplish goals.
- Be involved in a project that moves from early basic research towards clinical translation and from massive studies to single molecules
- Co-supervise PhD and Master students
- Participate in the oral presentation of all project findings and abstracts including participation in periodic project status meetings and presentation of final project deliverables

**Working conditions:**

- **Position type:** Full Time (40h/week)
- **Contract length:** fixed-term contract linked to programs financed with European Funds (NextGenerationEU/PRTR)

**Publication date:** 27/09/2024

**Deadline :** 16/10/2024 at 12pm

**Salary:** 32.963,80 €/year.

**Online registration**

Interested applicants should send a cover letter describing previous work experience and interests as well as their resume.

MINISTERIO  
DE CIENCIA  
E INNOVACIÓN

Financiado por  
la Unión Europea  
NextGenerationEU

**Online application**

In order to apply for the job position:

1. Gather in one single PDF file your resume and other remarkable merits.
2. Fill in the application form and attach the PDF file containing your application.
3. Submit the application form and the PDF file via web.

*General Data Protection Regulation (GDPR): By sending your application you confirm that you have read and accept IdiSNA Personal Data Protection Policy in the terms in which it is published on its website at the following link: <https://www.idisna.es/recursos-y-servicios/lopd>*

## ANEXO 1:

<b>Key requirements for the position:</b>	
Academic qualification:	<ul style="list-style-type: none"> <li>• Biology training and PhD in Bioinformatics and Oncology</li> </ul>
Working Experience:	<ul style="list-style-type: none"> <li>• Expertise analyzing clinical and genetic data.</li> </ul>
Specific knowledge:	<ul style="list-style-type: none"> <li>• Advanced English level; programming expertise</li> </ul>
Minimum requirements:	<ul style="list-style-type: none"> <li>• Having Spanish nationality or being a part of a Member State of the European Union or of a State to which, by virtue of International Treaties concluded by the European Union and ratified by Spain, the free movement of workers is applicable. Foreigners who have legal residence in Spain and a valid work authorization at the time of submitting the application and for the duration of the contract may also participate..</li> </ul>
<b>Desirable requirements:</b>	
<ul style="list-style-type: none"> <li>• Experience in flow cytometry, biomedical research and molecular biology is highly desirable.</li> </ul>	
<b>Aptitudes:</b>	
<p>Analytical thinking, initiative, communication and oral skills and great capacity for team work.</p>	

Merits will be evaluated using the resume. Other additional documentation that demonstrates and justifies the acquisition of these merits may be requested.

Shortlisted applicants must provide contact details of potential referees who may be contacted prior to the interview.

It is highly recommended to review the terms of the offer in order to provide necessary evidence to demonstrate that the application meets the inclusion criteria described in the position profile. The pre-selection process will be based exclusively on the review of the provided documents.

Due to the high demand expected for this type of position, applicants who do not meet key requirements indicated are suggested to abstain.
